Abstract:

Human is nature's priceless gift. But there is nothing kept stagnant by nature in this world. So that the human face of disasters. From that there are large losses.

Our schools, colleges and their student have been major affected from disasters. At that time our schools and colleges must be set against disasters. That's for Schools and colleges have sufficient facilities and awareness is crucial against disasters.

If B.Ed. College's trainees will be prepared for awareness of disaster management then students would be able to protect against disaster. So that this study has to be meaningful by investigator.

Keywords: AWARENESS TEST OF DISASTER MANAGEMENT, CONSTRUCTION AND STANDARDIZATION

Introduction:

Human is nature's priceless gift. But there is nothing kept stagnant by nature in this world. So that the human face of disasters. From that there are large losses. Our schools, colleges and their student have been major affected from disasters.

At that time our schools and colleges must be set against disasters. That's for Schools and colleges have sufficient facilities and awareness is crucial against disasters.

If B.Ed. College's trainees will be prepared for awareness of disaster management then students would be able to protect against disaster. So that this study has to be meaningful by investigator.

Title:

Construction and Standardization of Awareness Test of Disaster Management for B.Ed. College's Trainees of Ahmedabad District

Objective of the study:

- (1) To construction the awareness tests of disaster management for B.Ed. College's trainees.
- (2) To standardization of the awareness tests of disaster management for B.Ed. college's trainees.
- (3) To study for B.Ed. college's trainees about awareness of disaster management toward gender of B.Ed. college's trainees.
- (4) To study for B.Ed. college's trainees about awareness of disaster management toward area of B.Ed. college.

Hypothesis of the study:

Ho1. There is no significant difference between the average score of awareness tests of disaster management toward eastern and western area of B.Ed. colleges.

Ho2. There is no significant difference between the average score of awareness tests of disaster management toward male trainee and female trainees of eastern area's B.Ed. colleges.

Ho3. There is no significant difference between the average score of awareness tests of disaster management toward male trainee and female trainees of western area's B.Ed. colleges.

Methodology:

Survey methodology

Population:

The trainees of year 2012-13 are included from 36 B.Ed. colleges among the 87 B.Ed. colleges appended of Gujarat University.

Sample:

4 B.Ed. colleges of eastern area and 4 B.Ed. colleges of western area are selected as sample among the 36 B.Ed. colleges of Ahmedabad District.

Tools:

Self constructed the awareness tests of disaster management.

Data analysis:

Data analysis is made by t-test.

Result:

Ho.1 There significant difference at the level of 0.01 stage between the average score of awareness tests of disaster management toward eastern and western area of B.Ed. colleges. The trainees of western area's colleges are better than trainees of eastern area's colleges toward awareness of disaster management.

Ho.2 There is significant difference at the level of 0.01 stage between the average score of

awareness tests of disaster management toward male trainees and female trainees of eastern area's B.Ed. colleges. The male trainees are better than the female trainees of eastern area's colleges for the awareness of disaster management.

Ho.3 There is no significant difference at the level of 0.01 stage between the average score of awareness tests of disaster management toward male trainees and female trainees of western area's B.Ed. colleges. The male trainees and the female trainees of western area's colleges are similar for the awareness of disaster management.

Findings:

- (1) There are seen the effect of area in B.Ed. college's trainees toward awareness on disaster management.
- (2) There are seen the effect of gender in B.Ed. college's trainees toward awareness on disaster management.
- (3) There are not seen the effect of gender between male trainees and female trainees of western area's colleges toward awareness on disaster management.

Suggestion:

Using the awareness test on disaster management constructed in this study, depending on the test determine the level of awareness as high, low and weak trainees and for the weak trainees the training and insight to note about this subject can be uplift to the society. That's for came out with courage and so little loss of life from disaster situation.
